Built for Sustainability and Growth

Strategic Partnerships

We don't work with vendors, we make vendors work with us. All of our partners have agreed to the terms of what we are willing to pay, not what they are charging. Our rates are a fraction of Retail for vendor and tech expenses.

In House Technology & Development

All of our Apps, Websites, and AI-Software is built in-house saving the company hundreds of thousands of dollars in development and maintenance costs.

Automation, API, and AI Systems

We utilize breathrough AI technology, RestAPI, and Automation in every facet of our workflow to decrease labor costs and increase efficiency.

Capped Expenses

We don't add benefits and expand our budgets. We squeeze benefits into our existing per agent and per transaction expenses, or tweak other benefits to make room for new initiatives.

The Sweet Spot in Fee Structures

We are not a discount brokerage, but we're not expensive. We focus on offering value. Our agents pay Monthly Fees, a Company Split, and Transaction Fees.

Vertical Integration

Leveraging several key partnerships in the Real Estate industry, our alliances allow us to earn several ways on every aspect of a real estate transaction.
